

DENIOS

**ENVIRONMENTAL PROTECTION
& WORK SAFETY**

**DENSORB absorbent materials
are your ideal partner
when dealing with spills and leaks**

DENSORB®

Absorbent Materials

-  Absorbent fleece products
-  Emergency kits
-  Absorbent granules
-  Leak management and drain covers

**Protect the environment - save money.
With high performance absorbent materials**

For over 30 years, DENIOS has been the leading specialist in work safety and commercial environmental protection. DENSORB absorbent materials, a "made by DENIOS" product, have helped to limit the hazardous and environmentally damaging consequences of drip loss - in all industrial and chemical fields.

This catalogue brings together both proven DENSORB classics and many new products. You'll also find practical accessories and further useful products for commercial leak management and personal protective equipment.

This product catalogue has been made even easier to use. Technical information and important decision-making guidance can be found in the comprehensive introduction and on the product pages themselves.

You'll be able to find the right product for you more quickly. And with the 30 day sale or return policy, placing an order is risk free.

If you need any further assistance, our specialist advisers are ready to help either on the telephone or in person.

Protect your staff and the environment from leaking liquids. Avoid the incalculable risks and associated costs. DENSORB absorbent materials can help: reliable, value for money and safe!

Introduction to DENSORB absorbent materials

Powerful absorbents for the containment and absorption of liquids

Are you equipped for an oil or chemical incident? Can you safely prevent the pollution of the environment due to the release of water-polluting liquids?

Avoid the unnecessary costs and trouble! Even with smaller leaks there is a risk to the environment as well as safety at work and therefore employees. Chemicals and oils which get into the sewage system, the ground or the ground water, cause costly contamination.

Advantages in summary

■ Best absorption capacity

The DENSORB highly absorbent polypropylene absorbents are characterized by a high quality fine fiber structure which enables them to have an absorption capacity of up to 16 times their own weight. Due to the high absorption capacity of the material, consumption is minimised and the spilled liquid is absorbed much faster.

■ Optimal safety

DENSORB absorbent materials pose no health hazards and contribute to a clean and safe workplace.

■ Save money when disposing of refuse

Thanks to their lower weight and high absorption capacity, DENSORB absorbent materials cost considerably less to dispose of than conventional absorbents.

If you need expert advice on which absorbent products you need you can simply call us on 01952 811 991. Our product experts are ready to advise you on exactly what you need.

DENSORB starter set Universal

Powerful absorbents for the containment and absorption of liquids

Contents:

5 Premium absorbent mats 40 x 50 cm
5 Economy absorbent mats 40 x 50 cm
2 absorbent cushions 25 x 25 cm
2 absorbent socks 120 x 7.5 cm

Order no. 157-222-F2

DENSORB sample set Universal

Discover for yourself the outstanding qualities of the fine-fibre absorbent mat! Please request our free sample set.

Contents:

1 Premium absorbent mat 40 x 50 cm
1 Economy absorbent mat 40 x 50 cm

FREE

Order no. 132-399-F2

Three application areas: Universal, oil and special

Use the right DENSORB absorbent material for your requirements. Choose between Universal, oil and special versions.

DENSORB®

DENSORB Universal

Absorbs oils, coolants, solvents and water as well as non-aggressive acids and alkalis quickly and safely.

DENSORB oil

Absorbs oil and repels water. Oil is absorbed without even a drop of water being taken up. For oils, petrol, diesel, solvents, petroleum (hydrocarbon-based liquids)

DENSORB special

Ideal for absorbing acids, alkalis, and aggressive liquids. Should be used in emergencies involving unidentified liquids. The yellow warning colour highlights a potential hazard and allows the absorbed liquid to be clearly seen.

2 Material strengths:

DENSORB rolls and mats come in two material thicknesses. Use the right absorbent mats to suit your liquid quantities.

— HEAVY

Extra-thick material thickness with maximum absorption capacity for large quantities of liquid

Heavy = double the absorption capacity

— LIGHT

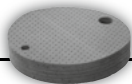

Equivalent to half the thickness of heavy, ideal for absorbing smaller quantities of liquid

Light = single absorption capacity

Which one is the right one?

Application	 ○ UNIVERSAL	 ○ OIL	 ● SPECIAL
Feature	hydrophilic, absorbs almost all liquids	hydrophobic, absorbs hydrocarbon-based liquids	hydrophilic, chemically inert, absorbs almost all liquids, including aggressive chemicals
Use	production, workshops, storage areas and many more	outdoor stores, loading areas, water and many more	storage and processing of aggressive chemicals, emergencies and many more

*These chemicals will react with polypropylene causing it to degrade.

DENSORB absorbent materials are available for various applications and in many practical forms. Choose the absorbent material that suits you according to the desired absorption capacity, durability and use.

Just 4 steps to find your right DENSORB product:

1. Select according to the type of liquid that has to be absorbed.
2. Select the format that suits you. You can use the application description as a guide for this.
3. Select the level of absorption capacity. The absorption capacity depends on the material composition of the products. Please note that some products come in two different material thicknesses: Heavy has twice the absorption capacity of Light. You'll find precise details on the respective product pages.

💧 = High absorption capacity

💧💧 = Very high absorption capacity

💧💧💧 = Extremely high absorption capacity

4. Choose the desired durability. The greater the durability, the longer the product will last.

● = Strong durability

● ● = Very strong durability

● ● ● = Extremely strong durability

Rolls For covering large areas on or beneath machinery susceptible to leaks

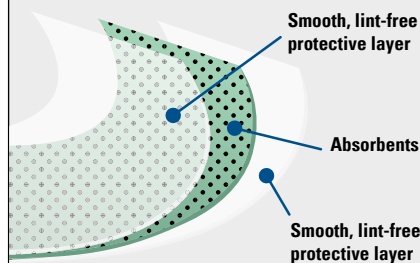

DENSORB Universal

Absorbs oils, coolants, solvents and water as well as non-aggressive acids and alkalis quickly and safely.

PREMIUM

High mechanical resistance ensures long life

- Premium quality with multi-layer design, suitable for the highest requirements for service life and cleanliness
- Lint free so ideal for sensitive applications and surfaces
- Both sides of the absorbent mat are strengthened with sturdy spun-bonded fabric to ensure high levels of tear and abrasion resistance

Rolls Universal premium

- High quality raw materials further improve absorption capacity and performance
- Very low risk of dripping thanks to strong adhesion between the surface of the fibres and the absorbed liquid

Rolls	Lightweight, narrow	Lightweight, wide	Heavy-duty, narrow	Heavy-duty, wide
External length [m]	90	90	45	45
Width, external [mm]	500	1000	500	1000

Rolls

For covering large areas on or beneath machinery susceptible to leaks

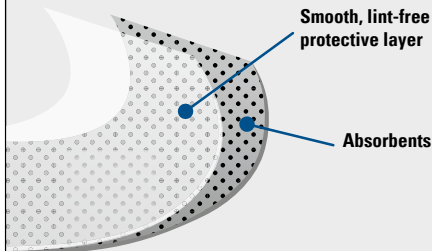

DENSORB Universal

Absorbs oils, coolants, solvents and water as well as non-aggressive acids and alkalis quickly and safely.

EcoSorb rolls are ideally suited to protecting larger areas

EcoSorb Rolls and Mats

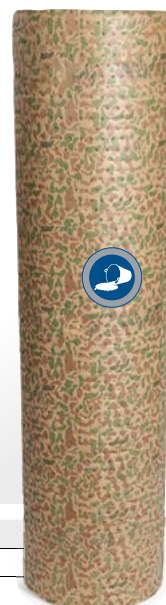

- Quickly absorbs all non-aggressive liquids
- Made from environmentally friendly recycled material
- The grey colour hides dirt and ensures a longer life. Lint free and sturdy with reinforcement layer on both sides
- Tear resistant even when saturated
- Absorbs liquids and retains them
- Rolls are excellent for covering large surface areas
- Suitable for gangways and driveways
- Especially economical with a very high absorption capacity
- Rolls are perforated in the middle and crossways for easy separation

Rolls	Roll
External length [m]	38
Width, external [mm]	720
Pack contents	1 Roll(s)
Absorption capacity [l / pack]	160
Order number	201-676-F2

Camouflage

- The camouflage design hides stains and dirt ensuring a long life. Reliably absorbs almost all liquids with a hydrophilic design
- With a strong top layer, can be used as a floor mat even in heavy duty areas
- Avoid accidents and cleaning costs
- Very low risk of dripping thanks to strong adhesion between the surface of the fibres and the absorbed liquid

Rolls	Rolls, narrow	Roll, wide	Roll, extra wide

Cushions Ideal for poorly accessible locations thanks to their flexible form, large absorption capacity with a small space requirement

DENSORB Universal

Absorbs oils, coolants, solvents and water as well as non-aggressive acids and alkalis quickly and safely.

Polyethylene spill pallet, volume (L): 5, external dimensions (mm) W x D x H: 290 x 290 x 70, Order no. 157-991-F2

Universal Absorbent Cushions

- Essential for containing leaks
- A special polypropylene filling ensures excellent absorption capacity
- Fluids which have been absorbed are reliably contained and are easily disposed of
- Essential aid for repair and maintenance work
- An especially flexible shape with a stretchy outer ensures limitless possibilities for use, even in places which are difficult to reach
- Especially high absorption capacity
- Ideal for long term use, for example when filling containers

External dimensions L x W [mm]	254 x 250	460 x 460
Pack contents	30 Item(s)	16 Item(s)

Order number	123-134-F2	123-135-F2

Cushions in trays, pack = 12 cushions with 6 trays

- Ideal for emergency containment, for example under leaking equipment
- The tray also protects the floor and if needed collects larger quantities of fluid
- Perfect for long term use anywhere where drips need to be collected for example when filling
- The absorbent mats prevent fluid spray and make disposal easier
- Absorbent mats and trays are compatible
- Dimensions L x W x H [mm]: 300 x 300 x 80
- Absorption capacity [l/unit]: 27

Order no. 123-130-F2

Socks

For containing leaks or for use in areas difficult to access

DENSORB Universal

Absorbs oils, coolants, solvents and water as well as non-aggressive acids and alkalis quickly and safely.

Your ideal product - it's quick and easy!

denios.shop/DENSORBfinder

Universal Absorbent Socks

- Essential for containing leaks
- Perfectly suited to absorbing liquids from faulty equipment or containers

Ø x L [mm]	75 x 1200	75 x 1800	75 x 3000	75 x 5000
Pack contents	20 Item(s)	12 Item(s)	4 Item(s)	10 Item(s)
Absorption capacity [l / pack]	86	103	43	179
Order number	123-138-F2	123-139-F2	123-140-F2	181-149-F2

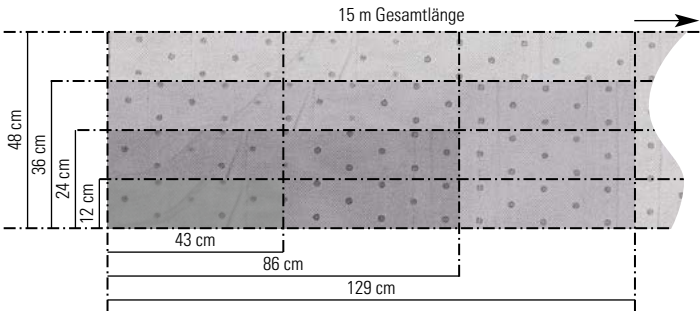

Universal Absorbent socks offer continuous protection against contamination from machinery

Multiformat

Versatile in use as a roll, mat, sock and wiper cloth, in a space-saving dispensing carton, ideal for mobile use or on workbenches

DENSORB
Universal

Absorbs oils, coolants, solvents and water as well as non-aggressive acids and alkalis quickly and safely.

Multiple perforations along and across the material allow the correct size for any eventuality to be torn off easily

Varioform - ready for any application:
four formats in one

- One product in 4 different formats:
roll - sock - mat - cleaning cloth
- A protective coating on both sides ensures the material is lint free and therefore also suitable for sensitive applications
- Supplied in a practical dispenser box for quick, efficient use anywhere

Application - DENSORB	Universal
External length [m]	15
Width, external [mm]	480
Absorption capacity [l / pack]	25
Order number	181-146-F2

DENSORB absorbent materials are available for various applications and in many practical forms. Choose the absorbent material that suits you according to the desired absorption capacity, durability and use.

Just 4 steps to find your right DENSORB product:

1. Select according to the type of liquid that has to be absorbed.
2. Select the format that suits you. You can use the application description as a guide for this.
3. Select the level of absorption capacity. The absorption capacity depends on the material composition of the products. Please note that some products come in two different material thicknesses: Heavy has twice the absorption capacity of Light. You'll find precise details on the respective product pages.

● = High absorption capacity

●● = Very high absorption capacity

●●● = Extremely high absorption capacity

4. Choose the desired durability. The greater the durability, the longer the product will last.

●● = Strong durability

●●● = Very strong durability

●●●● = Extremely strong durability

Rolls For covering large areas on or beneath machinery susceptible to leaks

DENSORB oil

Absorbs oil and repels water. Oil is absorbed without even a drop of water being taken up. For oils, petrol, diesel, solvents, petroleum (hydrocarbon-based liquids)

PREMIUM

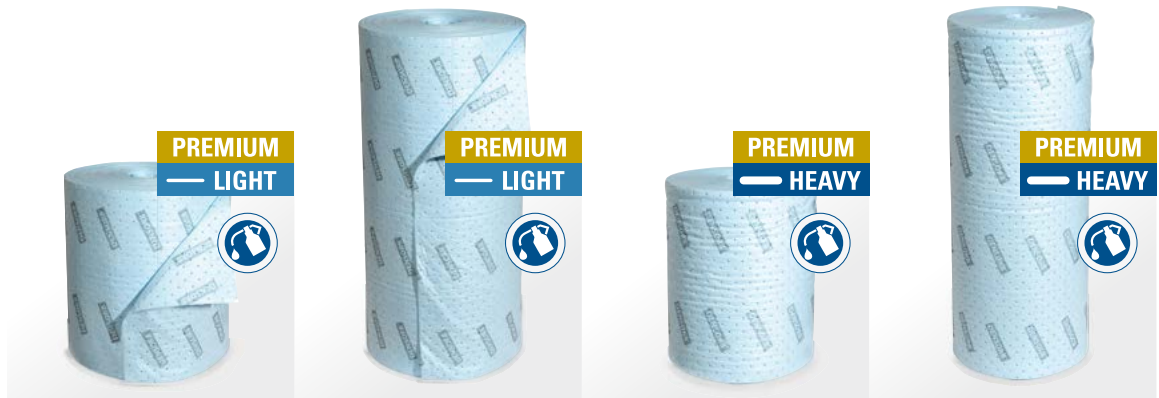

Suitable for Universal use in production and workshops

- Premium quality with multi-layer design, suitable for the highest requirements for service life and cleanliness
- High mechanical resistance ensures long life
- Lint free so ideal for sensitive applications and surfaces

Rolls oil premium

- Both sides of the absorbent mat are strengthened with sturdy spun-bonded fabric to ensure high levels of tear and abrasion resistance
- High quality raw materials further improve absorption capacity and performance

Rolls	Lightweight, narrow	Lightweight, wide	Heavy-duty, narrow	Heavy-duty, wide
External length [m]	90	90	45	45
Width, external [mm]	500	1000	500	1000
Pack contents	2 Roll(s)	1 Roll(s)	2 Roll(s)	1 Roll(s)
Absorption capacity [l / pack]	337	337	257	257
Order number	219-434-F2	219-435-F2	219-436-F2	219-437-F2

i 2 Material strengths:

— LIGHT

- single layered material for leaks and drips

— HEAVY

- double layered material for large quantities of liquids

Rolls

For covering large areas on or beneath machinery susceptible to leaks

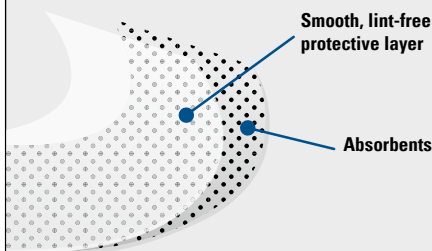

DENSORB oil

Absorbs oil and repels water. Oil is absorbed without even a drop of water being taken up. For oils, petrol, diesel, solvents, petroleum (hydrocarbon-based liquids)

EXTRA

Extra quality for long life and high efficiency

- The strong additional layer of spin-bonded fabric on the upper side ensures high tear and abrasion resistance
- Ideal as a heavy duty floor covering
- Well suited to long term use
- Tear resistant even when saturated with fluid

Rolls Oil Extra

- Tear resistant even when saturated with fluid
- Hydrophobic design ensures oil or hydrocarbon-based liquids are absorbed and water is repelled
- Ideally suited to use outdoors, even in rain thanks to water-repellent design

Rolls	Lightweight, narrow	Lightweight, wide	Heavy-duty, narrow	Heavy-duty, wide

Order number	178-454-F2	173-860-F2	173-869-F2

Rolls

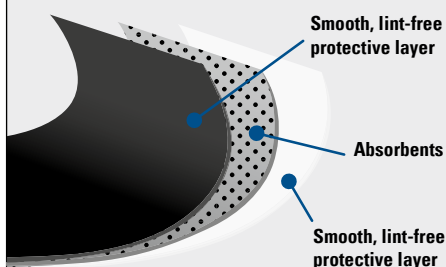

For covering large areas on or beneath machinery susceptible to leaks

DENSORB oil

Absorbs oil and repels water. Oil is absorbed without even a drop of water being taken up. For oils, petrol, diesel, solvents, petroleum (hydrocarbon-based liquids)

Long life Outdoor

- Developed for outdoors, water-repellent and UV-stable
- Ideal for long term use
- Reliable absorption of engine oil, diesel, heating oil, cutting oil, vegetable oil, oil-based solvents etc and more

Rolls and Mats Oil Premium

- Developed for outdoors, water-repellent and UV-stable
- Very strong protective layers: top black, bottom white
- Ideal for long term use
- Roll width is suitable for railway lines

Rolls	Narrow	Wide
External length [m]	24	24
Width, external [mm]	480	1450
Pack contents	2 Roll(s)	1 Roll(s)
Absorption capacity [l / pack]	55	176
Order number	204-221-F2	204-220-F2

Use on railway lines: the wide roll fits snugly between the rails. Side areas are protected with the narrow roll.

Mats

For use as required on a daily basis for workbenches and repair work.
A convenient, economical solution for small quantities of liquid.

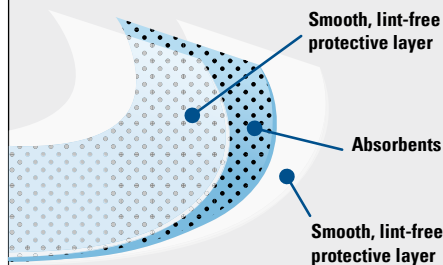

DENSORB oil

Absorbs oil and repels water. Oil is absorbed without even a drop of water being taken up. For oils, petrol, diesel, solvents, petroleum (hydrocarbon-based liquids)

Cushions

Ideal for poorly accessible locations thanks to their flexible form, large absorption capacity with a small space requirement

DENSORB oil

Absorbs oil and repels water. Oil is absorbed without even a drop of water being taken up. For oils, petrol, diesel, solvents, petroleum (hydrocarbon-based liquids)

DENSORB absorbent cushions in Oil version, e.g. for catching troublesome oil drips from machinery

Oil Absorbent Cushions

- Essential for containing leaks
- A special polypropylene filling ensures excellent absorption capacity
- Fluids which have been absorbed are reliably contained and are easily disposed of
- Essential aid for repair and maintenance work
- An especially flexible shape with a stretchy outer ensures limitless possibilities for use, even in places which are difficult to reach
- Especially high absorption capacity

External dimensions L x W [mm]	250 x 250	460 x 460
Pack contents	30 Item(s)	16 Item(s)

Order number	128-555-F2	128-553-F2	181-568-F2

Practical spring clips allow the individual segments to be quickly overlapped and connected to create an oil containment barrier of the required length

Dice For absorbing oils on water

DENSORB oil

Absorbs oil and repels water. Oil is absorbed without even a drop of water being taken up. For oils, petrol, diesel, solvents, petroleum (hydrocarbon-based liquids)

Oil dice, Order no. 119-244-F2

Oil Dice

- Can float on water even when saturated
- Ideally suited to removing oil or fuel spills from the surface of water
- Oil binder model I, II SF
- Very low risk of dripping thanks to strong adhesion between the surface of the fibres and the absorbed liquid
- The colour helps identification of saturation level
- Dice edge length: 50 mm
- Bulk density 328 G/L
- Material: polyurethane
- Supplied in a 10 kg PE bag (45 litres)
- Absorption capacity 15litres/pack

Skimmer For separating oil and water

Oil Skimmers

- Hydrophobic design ensures oil or hydrocarbon-based liquids are absorbed and water is repelled
- For easy removal of oil, fuel or other similar substances from drains, gullies, pipes or tanks
- Reliable absorption of engine oil, diesel, heating oil, cutting oil, vegetable oil, oil-based solvents etc and more
- Highly absorbent material in robust nylon netting with integral retrieval rope
- Especially suited to areas which are difficult to access

Emergency spill kit for incidents with aggressive liquids, box dimensions L x W x H (mm): 610 x 400 x 290, Order no. 163-776-F2

Socks For containing leaks or for use in areas difficult to access

Special Absorbent Socks

- The design of our absorbent socks are an ideal shape for containing leaks. Essential for containing leaks. Perfectly suited to absorbing liquids from faulty equipment or containers.
- An especially flexible shape with a stretchy outer ensures limitless possibilities for use, even in places which are difficult to reach.

Ø x L [mm]	75 x 1200	75 x 1800	75 x 3000
Pack contents	20 Item(s)	12 Item(s)	4 Item(s)
Absorption capacity [l / pack]	86	103	43
Order number	123-150-F2	123-151-F2	123-152-F2

Cushions Ideal for poorly accessible locations thanks to their flexible form, large absorption capacity with a small space requirement

Special Absorbent Cushions

- Ideal for long term use, for example when filling containers. Essential for containing leaks.
- A special polypropylene filling ensures excellent absorption capacity.
- Fluids which have been absorbed are reliably contained and are easily disposed of.
- Essential aid for repair and maintenance work.
- An especially flexible shape with a stretchy outer ensures limitless possibilities for use, even in places which are difficult to reach.

External dimensions L x W [mm]	250 x 250	460 x 460
Pack contents	30 Item(s)	16 Item(s)
Absorption capacity [l / pack]	69	65
Order number	123-136-F2	123-137-F2

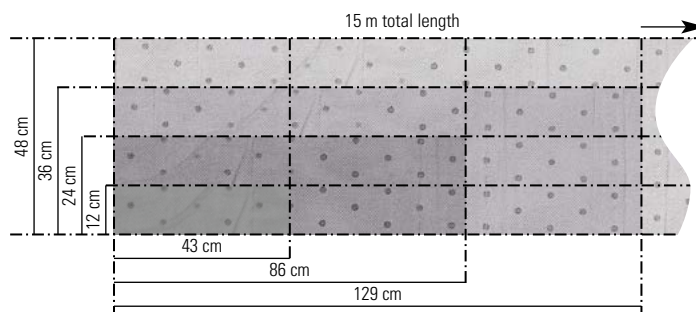

Multiformat

Versatile in use as a Roll, mat, sock and wiper cloth, in a space-saving dispensing carton, ideal for mobile use or on workbenches

DENSORB special

- Ideal for absorbing acids, alkalis, and aggressive liquids.
- Should be used in emergencies involving unidentified liquids.
- The yellow warning colour highlights a potential hazard and allows the absorbed liquid to be clearly seen.

Multiple perforations along and across the material allow the correct size for any eventuality to be torn off easily

Varioform - ready for any application: four formats in one

- One product in 4 different formats: roll - sock - mat - cleaning cloth
- A protective coating on both sides ensures the material is lint free and therefore also suitable for sensitive applications
- Supplied in a practical dispenser box for quick, efficient use anywhere

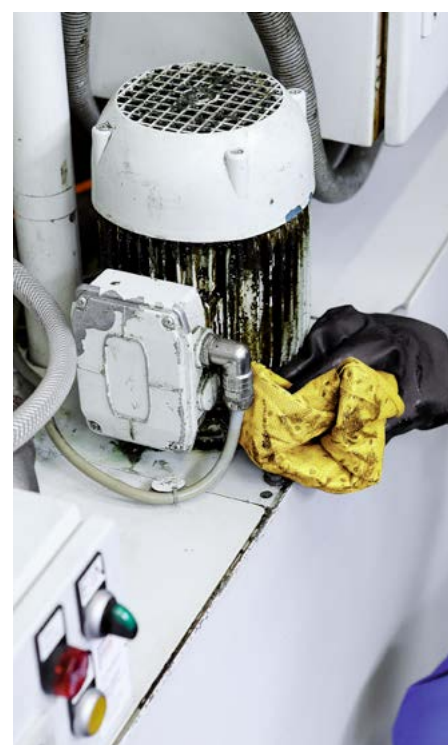

Application - DENSORB

Emergency set in transport box

- Extra large emergency spill kit with practical range of absorbent materials
- Packed so they are easy to use in the right order
- Ready to use, quick to get to the scene of the incident

Unfortunately, accidents involving oil or chemicals cannot always be avoided. So it's important to have the right products available at the right place. In this way you can react quickly and efficiently in the event of a serious incident. The transport box can be transported by pallet truck or forklift truck. In addition a version with 4 castors can also be supplied.

Safety boxes

- Ideal for use outdoors
- Essential for effective handling of leaks and incidents
- Emergency spill kits have protective gloves and a disposal bag for used absorbent materials
- Socks are used to contain leaks and prevent them spreading
- Mats and cushions are used to soak up the escaped liquid
- The robust design guarantees secure protection of the absorbent materials from weather and damage
- All important absorbent materials and utensils in easy reach

Spill kit storage box, filled with absorption material, absorbent capacity of up to 463 litres

For model SF 100 and SF 200

Contents:

100 mats 50 x 40 cm
6 socks 120 x 7.5 cm
8 cushions 25 x 25 cm
1 pair goggles with elastic strap
1 pair protective gloves
10 disposal bags

For model SF 100 and SF 200

Contents:

200 mats 50 x 40 cm
10 socks 120 x 7.5 cm
15 cushions 25 x 25 cm
1 pair goggles with elastic strap
1 pair protective gloves
20 disposal bags

For model SF 400

Contents:

400 mats 50 x 40 cm
20 socks 120 x 7.5 cm
40 cushions 25 x 25 cm
2 pairs goggles with elastic strap
2 pairs protective gloves
50 disposal bags

Small items such as gloves and safety glasses that you will need close at hand in emergencies can be stored handily in a lid pocket

🔥 = High absorption capacity

🔥🔥 = Very high absorption capacity

🔥🔥🔥 = Extremely high absorption capacity

DENSORB Universal

Absorbs oils, coolants, solvents and water as well as non-aggressive acids and alkalis quickly and safely.

Universal coarse granules

- Model III R
- Moler-based mineral granules
- Large grain size enables use outdoors, for example on roads
- Chemically inert, suitable for aggressive acids
- High absorption capacity and performance
- Non-flammable in unused state

Universal Fine Granules

- Model III R
- Mineral granules based on calcium silicate hydrate
- Very fine grain
- High absorption capacity and performance
- The light colour helps identification of saturation level
- Non-flammable in unused state

Gran Sorb Universal

- Anti-static
- Granules based on recycled cellulose
- Dust free and easy to remove
- Immediately binds on contact with oils, solvents, cooling lubricants and other non aggressive liquids
- Suitable for smooth surfaces
- Non abrasive, does not damage workshop floors
- Very little ash residue when burned

Universal Extra Coarse

- Model III R
- Sepiolite-based mineral granules
- Ideal for rough floors and outdoor surfaces with a high volume of traffic
- Chemically inert, non toxic
- The light colour helps identification of saturation level
- Non-flammable in unused state
- Maximum non-slip effect

DENSORB oil

Absorbs oil and repels water. Oil is absorbed without even a drop of water being taken up. For oils, petrol, diesel, solvents, petroleum (hydrocarbon-based liquids)

Floating oil binder

- Model I / II / III R
- Perlite-based granules
- Hydrophobic and extremely light, floats even on turbulent water
- Excellent for containing oil on the surface of water and on roads and floors

Environmentally friendly, floating oil binder

- Model I / II / III R
- Non-toxic natural product in biodegradable natural fibre
- Hydrophobic and very light
- Absorbs oil, diesel, heating oil, cutting oil, vegetable oil, oil-based solvents and other hydrocarbon-based liquids
- Can be used on the surface of water, roads or industrial floors
- Very little ash residue when burned

Quick-sorb oil binder

- Model III
- Polyurethane foam-based granules
- Hydrophobic and floating
- Extremely quick absorption of oil
- Ideal for tiled and sealed flooring
- Non abrasive, does not damage workshop floors

All-weather oil binder

- Model III R
- Polyurethane foam-based granules
- Hydrophobic and water-repellent
- Highly absorbent
- Suitable for roads and trafficked areas
- Can be effectively used even in rain and damp conditions

All-weather oil binder in 6 kg bucket, Order no. 208-190-F2

DENSORB special

- Ideal for absorbing acids, alkalis, and aggressive liquids.
- Should be used in emergencies involving unidentified liquids.
- The yellow warning colour highlights a potential hazard and allows the absorbed liquid to be clearly seen.

Multi-Sorb chemical and acid binder with colour indicator: the indicator warns the user by changing colour for acids (yellow) or alkalis (red).

Emergency spill kit for mercury leaks

- Specially designed to absorb mercury
- Prevents the emission of hazardous vapours
- Contains 500 G amalgamating powder which can absorb 680 G mercury
- Includes two sponges for easy handling

Emergency spill kit for mercury leaks, Order no. 160-161-F2

Chemical and acid binder, multi-sorb

- Model III R
- An absorbent for all hazardous materials
- Can be used immediately and without risk, even by untrained staff
- Granules based on a polymer compound with high absorption capacity
- Hydrophilic and chemically inert, absorbs all liquids
- Non-flammable, non-oxidising and does not generate explosive dust
- Highly economical and easy to use, also suitable for creating a bund
- Prevents emissions and condensation as its binds the hazardous materials immediately on contact

- Can be spread by hand or with a conventional GRIT TROLLEY
- Easy to clean up with a broom or shovel or with a sweeper
- Low volume left for disposal so low disposal costs

Chemical and acid binder, 400 g

Oil and chemical binder

- Model III R
- Moler-based mineral, calcinated granules
- Reliably absorbs almost all liquids with a hydrophilic design
- Ideal for absorbing acids, alkalis, combustible and flammable liquids
- Can be used on both smooth and porous surfaces
- Non-flammable in unused state

Oil and chemical binder, Order no. 159-823-F2

Waste disposal trolley incl. 2 Containers

- Ideal for quick use of granules in the event of a leak
- Even when heavily loaded the 4 swivel castors ensure good manoeuvrability
- Uneven loads can easily be moved over uneven surfaces thanks to the central hinge
- Includes 2 containers with 120 and 170 litres capacity for supply and disposal
- The two-part chassis can be folded to save space

Bestell-Nr. 123-168-15

Grit trolley

■ Even distribution of grit to minimise wastage

- Weatherproof polyethylene (PE) containers and grit trays
- Ideal for handling sand and salt
- Durable, maintenance-free and impact-resistant
- Low net weight

Capacity [l]	30	85
Overall load capacity [kg]	23	45
Order number	138-125-F2	138-126-F2

Your ideal product - it's quick and easy!

DENSORB absorbent materials finder:
denios.shop/DENSORBfinder

Conductive shovels for granules

- For distribution and disposal of granules
- Do not create an ignition source
- Ideal for granules that are saturated with flammable liquids
- Resistant to acids, alkalis and solvents

- Ergonomic shape
- Light and sturdy
- In quality, uv-stable plastic
- Smooth surface for easy cleaning
- Suitable for use in potentially explosive areas
- Ideal for handling explosive materials (e.G. Powder)
- Made of electrically conductive plastic
- The 35 cm wide shovel can contain over 5 litres of liquid
- Ergonomic shape (length 113 cm)

Order no. 201-665-F2

GritCaddy GRIT TROLLEY

- **Make sure granules, sand, absorbents and other granular materials are always available where you need them fast, both indoors and outdoors**
- **Optimum centre of gravity to make handling easier**

- Slightly sloping lid to ensure water runs off: can also be used as a carrying surface
- With smooth-running wheels and large, comfortable handle
- In environmentally friendly, high chemical resistant polyethylene (PE)
- Weatherproof
- Easy to clean
- Fully recyclable

	GritCaddy GRIT TROLLEY
Body dimensions W x D x H [mm]	700 x 669 x 1145
Order number	216-690-F2

The GritCaddy is your reliable tool for distributing granules of all types. It has an ergonomic handle, which can be gripped even with thick gloves, a slightly sloping lid to allow water to run off and easy to move 200 mm diameter wheels.

Granule supply trolley with sieve insert

- **Absorbent materials are available for use at any time**
- **Available quickly and easily where needed**
- **Disposal costs are lower**

- Practical design with two 55 litre chambers
- The supplied sieve fits on both chambers
- A roomy compartment offers space for utensils such as a shovel and broom
- The sturdy chassis with large, rubber-tyred wheels at the rear and castors at the front has 2 locking brakes
- The ergonomic handle ensures quick, easy transport to the incident site
- Made from chemical-resistant polyethylene

	Granule supply trolley with sieve insert
External dimensions L x W x H [mm]	1195 x 660 x 1070
Order number	239-976-F2
ACCESSORIES	Lid for supply trolley
Order number	239-977-F2

Granule supply trolleys with (optional) lids

Anti-static shovels for granules

- For distribution and disposal of granules
- Ergonomic shape
- Light and sturdy
- In quality, uv-stable plastic
- Smooth surface for easy cleaning

External dimensions L x W [mm]	250 x 110	515 x 247	1045 x 257
Order number	119-237-F2	119-236-F2	119-235-F2

Shut off - seal - cover - contain

Before hazardous liquids are cleaned up with absorbent materials, sensitive areas such as doors, drains, containers or the surface of water must first be secured using measures such as

- Gulley sealing
- Stopping holes in drums
- Blocking access ways
- Installation of floating oil barriers on the surface of water
- Catching drips, leaks and condensates

Sealing plugs

Carry case with 1 conical plug of each size

Carry case with 1 conical plug of each size,
Order no. 116-057-F2

■ For sealing drains and pipes

Average diameter [mm]	51	76	105
Order number	116-054-F2	116-055-F2	116-056-F2

Flexible separation barriers

The extremely impervious, flexible material on the bottom adapts well to the surrounding ground conditions

Spill barrier Ring, Ø 400 mm to protect against leaking liquids, for example when undertaking filling procedures over work and laboratory benches etc.,
Order no. 130-516-F2

- For limiting and retaining escaped liquids e.g. at drains
- The special plastic composite is resistant to water, hydrocarbons and many other chemicals
- Sticks to the floor and can be reused after washing with soapy water

Spill barrier (3 m) with convenient grips

External dimensions L x W x H [mm]	2000 x 45 x 50	3000 x 100 x 70
Order number	130-515-F2	116-046-F2

Neoprene sealing mats.

- Prevents hazardous materials entering drains and sewers
- Thin material for flexible adaptation including for non-metal drains
- For simple, inexpensive prevention of small leaks
- Light, space-saving, reusable and quick to clean
- Storage box for up to 5 sealing mats, available as an accessory
- Ideal for using with DENSORB emergency spill kits

	Neoprene sealing mats.

Magnetic sealant mats

- Hold reliably by magnetic force to all metal gully covers
- Weather- and temperature-resistant (-20 °C to +80 °C)
- Prevents hazardous materials entering drains and sewers
- Chemical-resistant and easy to clean
- Ideal for adapting to uneven flooring with dense, flexible material
- Storage box for up to 5 sealing mats, available as an accessory
- Ideal for using with DENSORB emergency spill kits

	Magnetic sealant mats		
External dimensions L x W [mm]	510 x 510	600 x 600	1000 x 1000
Field of use	Drain width max 200 mm	Drain width max. 300 mm	Drain width max 700 mm

ACCESSORIES	Storage boxes for up to 5 sealing mats		
External dimensions L x W x H [mm]	675 x 190 x 210	675 x 190 x 210	1075 x 190 x 210
Order number	132-787-F2	132-787-F2	132-789-F2

ACCESSORIES

Accessory: storage boxes for sealant mats

Sealant mats should always be available close to the potential hazard location. Swift access is therefore possible and initial action to minimise the hazard can be taken immediately.

- Robust boxes in environmentally-friendly polyethylene (PE)
- Ready for wall mounting (including mounting kit)

Storage box with carry handle and lid, ready for mounting to a wall

Sealing cushion

- Handy and ready to use at any time after filling with frost-proof liquid
- Weatherproof and tear-resistant
- Resistant to many acids and alkalis
- Can be used at -30 °C to +70 °C
- Dimensions W x D (mm): 700 x 700
- With tough stainless steel carry handle
- Practical stainless steel wall holder available as an accessory

Optional accessories:
stainless steel wall
mounting,
Order no. 208-738-F2

Sealant mats

- The sealant mats prevent the unwanted penetration of liquids into the ground or sewage system in the event of leaks
- Ideal for sealing pipe connections and gulleys
- Resistant to water, oil and most chemicals
- The flexible plastic composite on the underside matches the floor surface perfectly and can be used several times

The white protective foil attached to the mat prevents the mat from „sticking“ when it is rolled up and includes convenient handles making it easier to use

The extremely impervious, flexible material on the bottom adapts well to the surrounding ground conditions

Circular sealant Mats, available in 2 sizes

Model	A1	A2	A3	A5	A6	A7 (round)	A8 (round)

Lockable drain cover

- Seal off drains and gullies quickly
- No water-polluting substances can penetrate in the event of an incident or accident
- Consisting of aluminium stud plate, locking mechanism and polyurethane-based sealant material
- Sealant material on the underside adapts to surface and provides tight seal
- Compensates for uneven surfaces up to 40 mm
- Drain cover is attached to the gully by means of a spring-loaded tension lever
- Available in 2 sizes

2 sizes available:

- Lockable drain cover, 625 x 400 mm (approx. 5 kg), for drains in accordance with DIN (500 x 300 mm), Order no. 123-501-F2
- Lockable drain cover, 625 x 625 mm (approx. 7 kg), for drains in accordance with DIN (500 x 500 mm), Order no. 123-502-F2

Drain cover that can be driven over

- Consists of a 10 mm thick steel plate with a special seal running around the edge (H = 50 mm)
- The seal is compressed by its own weight and thereby levels out uneven surfaces

External dimensions L x W [mm]	625 x 625	750 x 750	1000 x 1000
Weight [kg]	32	45	80
Order number	130-305-F2	137-269-F2	137-272-F2

ACCESSORIES

- **Transport trolley** for quick and safe transport of drain seals; with a hinge mechanism. This enables the drain seal to be transported easily to the place where it will be used and can be positioned exactly on the drain
- **Stands**, for stable storage of the drive-over drain cover near the drain to be secured
- **Wall mounting** for safe fitting of the drain cover

Drip trays

- Drains drips, leaks or condensed water from roofs and pipes safely and cleanly
- Keep halls, machinery and products clean and dry

- High quality vinyl sheets with special coating
- UV and mould resistant
- Quick and easy mounting to ceilings and pipes with supplied rubber straps
- Space saving storage folded up
- Ready for a hose to be connected for draining
- Drain hose available as an accessory

Corrosion resistant surface spray

- Prevents uncontrolled leakage of dangerous liquids at flanged pipe connections in accordance with guidelines of the German professional chemical association (BGI 595)

- Effective protection for workers and production equipment from irritant, corrosive, toxic, hot, combustible, water-polluting substances
- Reusable and easy to clean
- In polypropylene (PP) - temperature resistant up to +80 °C
- UV resistant - can be used indoors and outdoors
- With integral viewing window for quick leak identification
- Incl. Velcro fastening and cord for simple, easy fastening

Liquid vacuum cleaner SV 6.4

Liquid vacuum cleaner model SV 6.4, Order no. 123-223-F2, £ 409.00

Contents:

- 1 vacuum pump with shut-off valve and fill level limiter
- 1 connector with 90° elbow for 2" opening
- 2 m vacuum hose, Ø 38 mm
- 1 crevice tool

■ Minimises the use of absorption materials and reduces disposal costs

■ For mounting on a steel bung hole drum (available as an option)

- Suitable for vacuuming the bottoms of dip tanks, removing diesel or oil from vehicles or for emptying spill pallets
- Fits all steel drums with 2" fine thread
- With compressed air drive
- Waste product can be reused
- Operates without a filter
- Float prevents over filling
- Waste product can be reused

Liquid vacuum cleaner SV 6.16

Liquid vacuum cleaner SV 6.16 With floor nozzle, Order no. 123-224-F2

Contents:

- 1 vacuum pump with shut-off valve and fill level limiter
- 2 m vacuum hose, Ø 38 mm
- 1 Camlock quick connector
- 3-part suction pipe
- 1 floor nozzle with rubber edge
- 1 hand nozzle

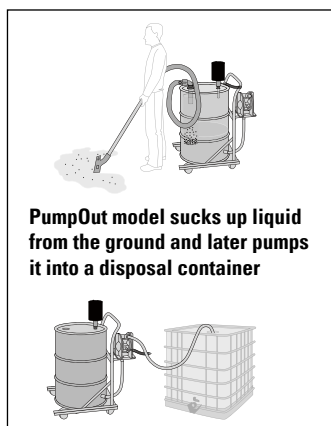

Model	SV 6.4	SV 6.16
Order number	123-223-F2	123-224-F2

ACCESSORIES

	Order number
Extension hose for vacuum cleaner model SV 6.4, 3 m long, Ø 38 mm	177-326-F2
Drum belt for 200 litre standard drums	174-321-F2
ATEX wet vacuum cleaner, to filter solid materials	173-840-F2
sieve for 200 ltr. liquid exhauster	179-650-F2

Liquid vacuum cleaner model PumpOut and PumpOut ATEX

- Compressed-air extractor and pump for liquids with a flashpoint over 55 °C

PumpOut ATEX, Order no. 186-281-F2,

Contents:

- Venturi pump with fill level limiter (for suction)
- diaphragm pump (for pumping)
- suction hose and pipe, floor nozzle (not for solvents!)
- Strainer basket for filtering solid particles
- 200 litre container and transport trolley
- drum belt to prevent deformation from underpressure

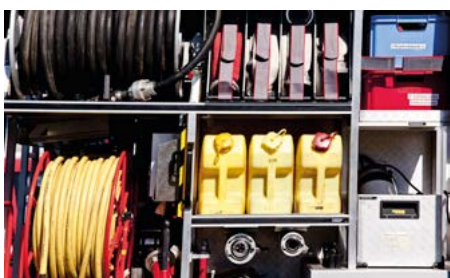

PumpOut system:
suck up and pump out liquids with one machine

Model PumpOut system:
One unit for sucking up and emptying, Order no. 179-647-F2

Fold away re-usable leakage sumps

- Practical carry bag available as accessory
- Small investment to prevent substantial consequential costs
- Quick and easy to use, for example in an emergency or also as prevention in an area at risk/ hazardous situation
- Also suitable for temporary storage of chemicals
- Chemically-resistant to heating oil, diesel, petrol, hydraulic oil, etc
- With integral level indicator
- Compact when packed up
- Can also be used as a sheet or basin (e.G. For decontamination)
- Practical carry bag available as accessory

i Thanks to a highly compact folded down size, the flexible reusable sump can be stored on emergency fire vehicles for example

Sump capacity [l]	25	75	175	210	300	900	1600

Leak containment systems

Flexible sumps

- Effective containment device for many different types of leaks - from a leaky drum to a fault piece of equipment

Fold away leakage sumps for single use

- Rapidly absorbs water-hazardous liquids after accidents or other leaks
- The folding leak pallet springs back by itself thanks to integrated floating elements
- For single use

Sump capacity [l]	15	100
External dimensions L x W x H [mm]	600 x 400 x 100	1000 x 1000 x 150
Order number	137-314-F2	116-052-F2

T-coded Salvage Drum

- Approved for salvage and transport
- UN approval 1A2 T / Y446 / S / / D / BAM
- Rapid, universal aid for fire service, plant security, harbour authorities, carriers and waste management
- Equipped with removable lid and clamping Ring, including lever lid
- With reinforcement beading for lateral stability
- Made from steel, painted black on the outside
- For transport in accordance with ADR, RID and IMDG code

Salvage drum with 205 litre drum inside (205 litre drum not included in delivery),
Order no. 157-698-F2

Polyurethane drum bandages (PU)

- For steel and plastic drums
- Resistant to oil and many acids and alkali
- Fastens on easily and quickly
- Nylon belt (4 m long) with a practical velcro fastener
- Bandage dimensions L x W (mm): 300 x 180
- In practical carry case

Drum bandage in practical carry case,
dimensions W x D x H (mm): 380 x 300 x 90,

Drum dollies for drum overpacks

- For the safe transport of 205 litre steel drums, salvage drums and drum overpacks
- In galvanised steel
- Adjustable from Ø 680 to 840 mm
- Easy to move on 4 swivel castors

Design	Electrically conductive	Non-electrically conductive
Order number	127-147-F2	115-199-F2

Cleaning cloths

- High quality, made from clean recycled materials
- No foreign bodies such as hooks, buttons or zips

Type KB

- Light cotton mix fabric for large areas of contamination
- Ideal for use in the workshop, construction etc

Type TB

- Classic knitted cleaning cloths in soft, absorbent cotton in bright colours
- Suitable for workstations, machinery or tanks – anywhere where a lot of liquid needs to be mopped up

Type BW

- Made of white cotton bed linen

Type TW

- Pure white cotton, soft, absorbent, low lint
- Ideal for use with solvents

Order in packs of
- 3 x 10 kg compact cubes
- 30 x 10 kg compact cubes
(full pallet)

Roll stand, mobile, incl. Waste sack holder and cutting edge, dimensions W x D x H (mm): 440 x 750 x 870, Order no. 116-578-F2

Cleaning tissues

- Double layered cleaning cloths for light industrial work
- Handy cleaning cloth for industrial use and fabrication
- The cloth is strong, low-lint and absorbent
- Cloth size 20 x 30 cm
- 4 rolls, each with 250 tear off cloths

Design	Roll
Pack contents	4 Roll(s)
Outlines [Item(s)]	1000
Order number	123-192-F2

Safety first - when dealing with emergencies where dangerous chemicals are released, any workers involved need to be properly protected.

Before any leaked liquids can be removed using absorbent materials, the situation needs to be approached with suitable equipment, in order to avoid any possible consequences to health, which could even be irreparable. Any hazardous leaked liquids can then be removed in a safe manner with optimum protection, using performance sorbents in the form of rolls, mats, cushions, socks or granules.

Indirect damage is prevented by the provision of protective equipment

- Chemical protection gloves
- Safety glasses
- Eyewash bottles

Sol-vex® chemical protection glove

- Category III versatile glove in nitrile
- Very good grip in the wet or dry
- Very comfortable to wear
- High abrasion resistance, 0.38 mm coating thickness
- Cotton coated, dimpled
- Length: approx. 33 cm
- Sizes 8 - 11

Pack = 12 Pair
Order no. 180-458-F2

Ansell

Area of application: Chemical manufacturing processes, oil refineries, metal production, handling agricultural chemicals, printing shops

Dermatril

- Category III nitrile single use gloves with rough finger tips, paint resistant
- Suitable for storing food
- Packed in practical dispensing carton
- Sizes 7 - 10
- Length: 24 cm coating thickness: 0.1 mm
- Length: 28 cm coating thickness: 0.2 mm (approved as a full chemical protection glove)

Pack = 50 Pair ①
Length 240 mm, coating 0.1 mm
Order no. 158-073-F2

Pack = 25 Pair ②
Length 280 mm, coating 0.2 mm
Order no. 158-074-F2

Area of application: Laboratory work, examinations, taking samples, protection against chemicals as an underglove, industrial and building cleaning, handling foodstuffs

Camatril

- Category III light, mechanical resistant chemical gloves in nitrile
- Cotton coated
- Silicone free
- Rough latex coat in the inside hand
- Paint-indifferent
- Suitable for storing food
- Sizes 7 - 10

Pack = 10 Pair
Length: 300 mm
Order no. 158-063-F2

Pack = 10 Pair
Length: 400 mm
Order no. 158-066-F2

Area of application: Laboratory work, printworks, chemical industry, cleaning and maintenance work, food preparation

Pack = 10 Pair

Safety glasses Solus

- Panoramic safety glasses with optimum curved lenses for distortion-free peripheral vision while ensuring a close fit
- Black / orange accented side arms
- Attractive dual lens look
- Very light (23 g)
- Comfortable to wear
- Clear polycarbonate lens, UV protection
- Incl. microfibre bag for protection and cleaning
- Complies with EN 166

Model	Solus

Safety goggles Fahrenheit

3M PELTOR™

- Specifically for wearing with prescription glasses, dust masks or respiration half masks
- Side grooves for side arms of prescription glasses
- Comfortable, soft PVC frames
- 180° undistorted view
- Indirect ventilation
- Incl. microfibre bag for protection and cleaning
- Clear polycarbonate lens, UV protection,
- Complies with EN 166

ACCESSORIES

Polyester protective strip for Fahrenheit goggles (1 unit = 10 pieces), Order no. 183-897-F2

Goggles uvex ultrasonic - 9302

- Very light goggles - no pressure problems when wearing continually
- Suitable for wearers of glasses
- Optimum ventilation
- Panoramic field of view
- Frame colour: orange / grey
- Polycarbonate lens, colourless, UV protection
- Outside highly resistant to scratching, inside permanently mist-free and chemical resistant
- Complies with EN 166

Order no. 188-854-F2

Safety glasses uvex super OTG - 9169

- Latest lens technology for optimum quality of vision
- Hinge-free side arms with soft, highly flexible end pieces
- Frame colour: navy blue
- Polycarbonate lens, colourless, UV protection
- Extreme scratch and chemical resistance
- Can be worn with or without prescription glasses
- Complies with EN 166

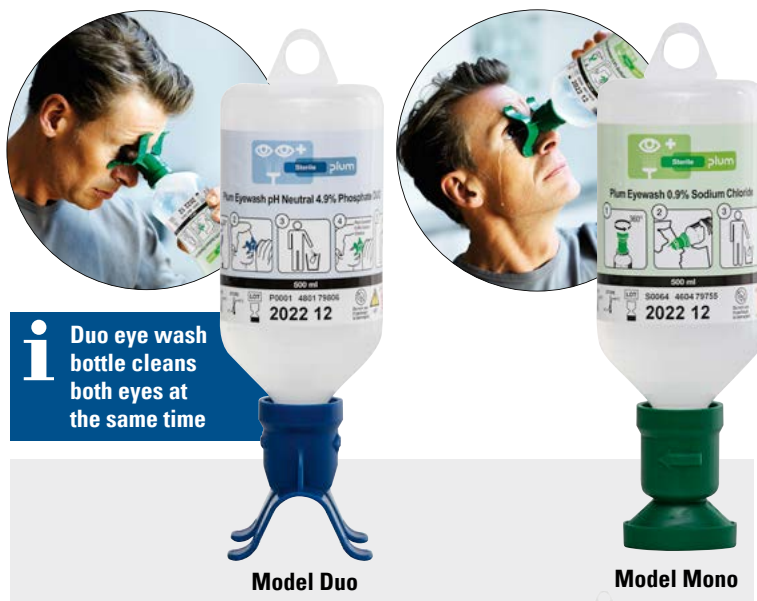

Order no. 188-852-F2

Eye wash bottles

Eye wash bottles

- To quickly rinse in case of an eye injury, to prevent permanent damage
- Special eye bath attachments that help to keep the eyes open
- Ergonomically designed eye shield
- Handy plastic bottle, sealed and sterile, maintenance free
- Simple and safe to use with instructions for use and pictogram on the bottle
- Keeps for 3 years unopened
- Eyewash bottles, with either saline or ph-neutral phosphate buffer solution
- Washing time, model Mono: 200 ml bottle: approx. 2 Minutes, 500 ml bottle: approx. 5 Minutes; model Duo: 500 ml bottle: approx. 2 Minutes per eye, 1000 ml bottle: approx. 5 Minutes per eye

Anti-fatigue mats

Ergonomic safety matting for wet areas

- For general applications the black mats made from natural rubber mixture are more suitable
- For handling oil and greases the red mats made from nitrile rubber mixture are more suitable

- For medium duty use
- Springy rubber for greater comfort when standing and fewer signs of fatigue
- The surface remains dry, clean and non-slip as fluid can drain off through large drain holes and raised ribs on the underside
- 4 sloping edges for safety and easy vehicle access
- Non-slip surface as per DIN 51130
- Cleaning with soap and water is recommended for increased life

Model	ST 9.15	ST 9.30	ST 9.60

Anti-fatigue protection

Conforms to slip resistance test EN 13552 category R10

Insulation (from cold floors)

Resistant to oil

Liquids can drain away, drainage

Flooring is protected

Flooring solutions for wet, dry or oily areas

Flexible connection system makes it easy to lay a large area of workshop matting

- For intensive use
- Very good anti-fatigue characteristics thanks to extremely flexible design on the underside
- For wet, dry or oily areas
- The flexible connection system ensures a firm permanent join (no adhesive is required)
- Dirt and liquids can flow away through the drainage system
- Resistant to synthetic / hydraulic oils
- Fire protection class cfl-s2 in accordance with EN ISO 13501 and class 1
- Anti-slip surface for high tread safety, non-slip stud-plate profile, R10
- Yellow, sloping safety edges and corners
- Anti-slip R10 in accordance with DIN 51130 and BGR 181

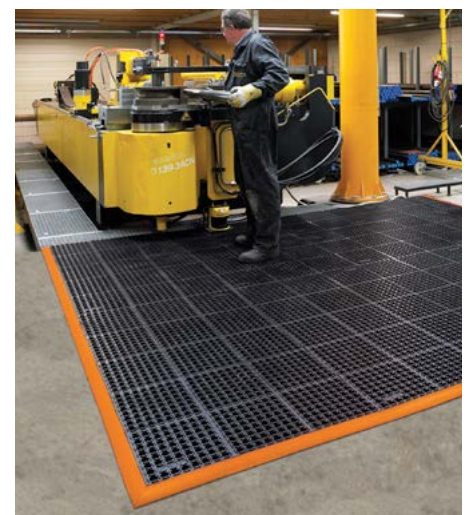

Available with suitable edge strips to minimise the risk of falling and allow easy access
